EXPERIENCE

Front End Developer

MetaArt

02/2024 - 01/2026 online

My experience and accomplishments:

- Developed reusable and scalable UI components.
- Implemented responsive design improvements and fixed QA-related issues.
- Built payment tracking and training session management pages.
- Integrated Google Maps and Leaflet Maps using the Factory design pattern.
- Added frontend pagination and PWA support.
- Integrated REST APIs and handled asynchronous data fetching.
- Worked with state management and optimized application performance.
- Implemented form validation and error handling.
- Collaborated with designers and backend developers to deliver user-friendly interfaces.
- Improved application usability and cross-browser compatibility.
- Refactored existing codebase to improve maintainability and readability.

EDUCATION

Software engineer

Computer Academy IT STEP Kharkiv

05/2023 - 06/2025

SUMMARY

Frontend Developer specializing in React and TypeScript with experience developing responsive web applications, reusable UI components, and modern user interfaces. Experienced in API integration, state management, performance optimization, and building scalable frontend solutions with clean and maintainable code.
